Mr. Gary Baughman
Hazardous Waste Facilities Unit Leader
Colorado Department of Health
4300 Cherry Creek Drive South
Denver, Colorado 80222-1530

Gentlemen:

Based on a meeting on Monday, June 13, 1994 with your staff the following items were presented regarding Operable Unit (OU) No. 2 risk assessment:

- OU 2 will delineate/combine 5 risk source areas: the 903 Pad, the Mound, the Northeast Trenches, the Southwest Trenches, and the remaining surficial soils outside of these areas.
- We will use the Colorado Department of Health Conservative Screen methodology to calculate the risk ratio associated with the five sources delineated for OU 2.
- We will begin aggregating data based on the five source areas mentioned above.

In addition, we will pursue OU specific Reasonable Maximum Exposure factors, land use scenarios and Preliminary Remediation Goals and present them to your staff as soon as possible.

If you have any questions, please contact Scott Grace of my staff at 966-7199.

Sincerely,

Steve Slaten
